CF-220 Centrifuge

Simple and versatile

The CF-220 is an ergonomic and user-friendly clinical centrifuge for separating substances with different relative densities by using centrifugal force. The maximum rotational speed of 15,500 rpm gives the centrifugal force of 23,100 rcf.

With seven different rotors available, it suits various applications. Easy to operate, it streamlines processes while maintaining precision.

The large, illuminated LCD interface is modern and offers great visibility.

User manual, rotor key, and power cord included with instrument. All rotors, buckets, and inserts are sold separately.

Part number: CF-220-120/220/220UK
